

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

THE DIVINE PLAN

Envision with us Beloved...

A Sacred Invitation to Co-Create New Earth Together

Peace, Love & Light, Divine Being,

If these words have found you, perhaps they arrive as an invitation to remember something your soul has always known—a way of living rooted in sacred relationship with the Earth, with one another, and with the Divine.

What we are cultivating is more than a place to live. It is more than a retreat center, a village, or a piece of land. It is a living prayer—a shared vision devoted to healing, stewardship, community, and the remembrance of our sacred connection with all of Life.

This document offers an introduction to the Divine Plan for those who feel called to explore participation within the **GFI Healing Arts Retreat Center & Community Village** through Stewardship Residency, sacred exchange, healing arts service, or other mission-aligned pathways of contribution.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

This vision first called forth a community of healing artists, educators, land stewards, visionaries, and compassionate servants—individuals who feel inspired to dedicate their gifts in service to personal healing, collective wellbeing, and the restoration of our relationship with the Earth.

We are currently welcoming our twelve Founding Stewardship Members to help establish the living foundation of this shared vision.

Rather than offering land as a conventional real estate transaction, we are cultivating a Covenant-Based Stewardship model rooted in reciprocity, shared responsibility, and sacred relationship with the land. Contributions may be expressed through financial stewardship, sacred exchange, service, professional gifts, or other mutually aligned forms of participation that support the flourishing of the community.

We are calling together individuals who feel genuinely aligned with this vision—those who feel inspired to build together, serve together, celebrate together, grow together, and care for both the Earth and one another through a life of shared stewardship.

The frequency we seek to cultivate begins within each of us.

As we embody peace, love, light, harmony, compassion, and integrity, we become living expressions of the New Earth we are called to create.

This sacred land is intended to become a home for those who feel drawn toward a life of sacred heart-centered service, spiritual practice, regenerative living, and conscious connected community—a place where diverse gifts are woven together in support of a purpose greater than any one individual.

Here, service is not viewed as self-sacrifice but as sacred reciprocity. As we care for one another, we strengthen the wellbeing of the whole. As we restore the land, the land restores us. As we heal ourselves, we become better able to support the healing of humanity.

Through the GFI Healing Arts Retreat Center, we are called to offer sanctuary for individuals seeking healing, renewal, education, remembrance, transformation, and ascension. Together we hold space for those navigating life's challenges, releasing inherited patterns, cultivating wellbeing, and awakening more fully to their highest potential.

While stewardship contributions help establish the physical foundation of this vision, they are only one expression of participation. What matters most is sincere resonance with the mission to raise the vibration and frequency of the earth, a willingness to participate in shared stewardship of the land, and a heartfelt desire to contribute to something that benefits both present and future generations.

Because this vision is being cultivated intentionally and in harmony with the capacity of the land, Stewardship Residency opportunities and sacred exchange pathways remain intentionally limited during these foundational stages. Our mutual discernment process allows both prospective Members and GFI to explore whether there is genuine alignment, shared values, and a harmonious fit for long-term community life.

This process is not about exclusion. It is about honoring the land, the mission, and the relationships we are being entrusted to cultivate together. We trust that those who are truly called will arrive in divine timing, just as the land itself has arrived through Divine assignment.

If your heart resonates with this vision, we warmly invite you to continue reading.

Our Vision

We are co-creating the **GFI Healing Arts Retreat Center & Community Village** as a regenerative, healing-centered community where individuals live, learn, create, serve, and thrive together through shared stewardship of the land and one another.

The guiding vision that inspired this work was beautifully simple:

- Invest in land we can lovingly steward.
- Create a Healing Arts Retreat Center.
- Home a thriving Community Village.
- Grow nourishing food together.
- Build regenerative spaces in harmony with nature.
- Host healing arts gatherings, festivals, and educational experiences.
- Contribute to raising the collective vibration of humanity through love in action.

Together we are cultivating a place where we can:

- Anchor peace, love, light, harmony, and sacred stewardship into the Earth.
- Live regeneratively in partnership with nature.
- Offer sanctuary for healing, holistic education, transformation, and spiritual growth.
- Support the restoration of healthy relationships with self, community, and the natural world.
- Serve as a living example of compassionate, cooperative, and Earth-honoring community.

This community is growing intentionally, one relationship at a time, with reverence for the land, respect for one another, and trust in Divine timing.

Community Standards: Nourishment, Healing Arts & Sacred Energy Technology

Plant-Based, Meat-Free Community

At the GFI Healing Arts Retreat Center & Community Village, we are cultivating a plant-based, meat-free healing arts community rooted in sacred stewardship, conscious living, and reverence for all life.

We honor the body as a sacred vessel—the living temple through which we experience, create, heal, serve, and embody Divine consciousness. The way we nourish ourselves is an extension of our relationship with the Earth, with Source, and with our highest expression of being.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

We believe that conscious nourishment supports the cultivation of a high-vibrational community field by supporting:

- Higher vibrational coherence and energetic alignment
- Nervous system balance and embodied presence
- Clear energetic channels for healing arts practice
- Deep embodiment, sensitivity, and intuitive awareness
- Harmony with the land and all living beings

The vibration of our community is an essential part of the healing sanctuary we are creating, especially for those who are called to serve humanity through healing arts, sacred ceremony, and collective transformation.

We recognize that nourishment extends beyond what we consume physically. It includes the energy we carry, the thoughts we cultivate, the love we share, and the relationship we create with ourselves, each other, and Mother Earth.

Through conscious nourishment, we remember that every choice is an opportunity to honor life, deepen our connection with the Earth, and contribute to raising the vibration and frequency of humanity.

Transition & Alignment Journey

We honor that every soul is walking a unique journey of healing, awakening, and transformation.

Those who feel called to join the GFI Healing Arts Retreat Center & Community Village and are already fully aligned with a plant-based lifestyle or feel called to live this way and complete their personal transition before joining us on the land.

This is not a path of judgment, but a path of intentional alignment.

We are cultivating a specific energetic field dedicated to healing, service, sacred ceremony, and conscious community living. Those who enter this space are invited to come with an open heart, a willingness to grow, and a sincere desire to participate in the shared frequency we are creating together.

Healing artists, facilitators, ceremonial leaders, and practitioners serving within the GFI Healing Arts Retreat Center & Community Village are called to embody these principles as part of their sacred service.

Those holding space for others through healing arts, ceremony, teaching, and collective offerings are invited to fully align with a plant-based lifestyle and a clear, sober, substance-free path that supports the integrity of the healing field.

Certain healing offerings may include sacred preparation practices, including fasting protocols, as guided by the practitioner and the intention of the offering.

We honor families and children as they move through their own journeys of transition. Vegetarian pathways are supported for non-serving family members in transition, however, the overall community

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

environment is rooted in a meat-free, plant-based lifestyle for residents, families, and guests participating within the village.

Together, we create a field of harmony, coherence, and sacred intention.

Our Sober, Substance-Free, High-Vibrational Environment

The GFI Healing Arts Retreat Center & Community Village is intentionally cultivated as a sober, clear, and high-vibrational environment devoted to healing, consciousness expansion, sacred service, and direct connection with Divine Source.

Our community lifestyle is free from alcohol, smoking, recreational drugs, tobacco, cannabis, and psychedelic substances throughout our sacred land spaces.

This choice is not made from judgment of any person's path.

We honor that many souls walk different journeys of healing, awakening, and remembrance. Every being has their own divine timing and their own experiences that contribute to their evolution.

The path we are called to steward is one of next level ascension, one of direct communion with Source through the wisdom already within us, no longer dependent on substances.

Through sacred movement, meditation, breathwork, sound healing, prayer, connection with nature, embodiment practices, and the expansive power of the healing arts, we explore the innate ability of the human spirit to awaken, transform, and remember its divine nature.

We believe that humanity is entering a profound time of awakening, and our collective healing ministry is devoted to supporting this transformation by raising the vibration and frequency of ourselves, one another, and the Earth.

For those who are transitioning away from substances or previous ways of being that no longer align with their highest path, we hold compassion and support.

Transformation is sacred.

Remembering who we truly are is sacred.

Our Relationship With Psychedelics & Plant Medicines

At the GFI Healing Arts Retreat Center & Community Village, we honor the many spiritual traditions and healing pathways throughout the world that include sacred plant medicines and ceremonial practices.

We recognize that these paths have supported many souls in their healing journeys, spiritual exploration, and connection with the Divine.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

We honor all paths while also honoring the unique path we have been called to embody.

Within GFI, we do not rely upon psychedelics or psychoactive substances—including cannabis, mushrooms, ayahuasca, or other plant medicines—as part of our healing arts ministry, ceremonies, spiritual practices, or community offerings.

Our mission is to teach and embody a path of ascension rooted in direct connection with Divine Source—the remembrance that the wisdom, healing, and transformation we seek already exists within us.

Through The Goddess Flow Method™, we explore the sacred technologies of the human body and spirit through movement, breath, meditation, sound, energy, consciousness, and embodiment.

We believe we have all been gifted the ability to connect with the Source of all creation from within.

This is the path we have been called to steward.

A path beyond dependence upon external substances.

A path of remembrance.

A path of embodied Divine connection.

A path of love, healing, service, and sacred stewardship.

For those whose journey includes plant medicines, we honor and respect your path. Every soul is moving through its own evolution and awakening.

The GFI Healing Arts Retreat Center & Community Village is simply a sanctuary devoted to a specific frequency—a community of healing artists, lightworkers, starseeds, earth stewards, and sacred servants who feel called to cultivate connection through Source, through love, and through the divine wisdom already present within.

Together, we co-create a living sanctuary dedicated to healing humanity, honoring the Earth, and raising the vibration and frequency of all life.

The Goddess Flow Method™: The Blueprint and Pillar of This Community

At the heart of the **GFI Healing Arts Retreat Center & Community Village** is **The Goddess Flow Method™**—an ancient-future inner technology system created to support remembrance, embodiment, healing, and alignment with our highest divine nature.

The Goddess Flow Method™ is rooted in the understanding that within every human being exists an innate wisdom, healing intelligence, and divine connection waiting to be awakened.

This sacred embodiment system integrates:

- Divine Energy Alchemy

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Divine Embodiment and Divine Design Activation
- Nervous System Regulation and Cellular Harmony
- Inner Healing, Self-Realization, and Ascension

Through this path, we cultivate remembrance of:

- The medicine within
- The wisdom of the body
- Sacred ceremony with Divine Spirit
- Direct connection to Source of All Creation
- Alignment with our Divine Design encoded within our being
- The awakening of our gifts, purpose, and highest expression of service

We recognize that we are each channels, pillars, and vessels of Divine Love and Light. Through our healing, our embodiment, and our devotion to conscious living, we become living expressions of the Divine moving through us.

The Goddess Flow Method™ supports the journey back into sovereignty, clarity, and remembrance—the awakening of our own inner connection with Source and the realization that the deepest healing begins within.

Our Mission & Earth Stewardship

The mission of the **GFI Healing Arts Retreat Center & Community Village** is to contribute to the healing and awakening of humanity while raising the vibration and frequency of the Earth through our collective healing arts ministry, sacred stewardship, and conscious community.

We believe that every act of healing, every moment of love, every sacred offering, and every choice made in harmony with the Earth contributes to the greater awakening of the collective.

Our purpose is to:

- Restore humanity to its highest nature and divine design
- Align the body, mind, spirit, and Earth as one sacred living system
- Guide beings into remembrance of their truth, gifts, purpose, and divine origin
- Cultivate a regenerative relationship with the Earth through sacred land stewardship
- Create a sanctuary where healing artists, lightworkers, starseeds, and conscious beings may serve, create, learn, and grow together

Through plant-based living, embodied spiritual practice, healing arts, and inner mastery, we return to harmony with:

- The land
- The body
- Each other
- Source
- All that is

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

This is the foundation through which we co-create Heaven on Earth—not as an idea outside of ourselves, but as a lived reality embodied through love, consciousness, service, and sacred relationship.

A way of life honoring every being:

Man, Woman, and Child.

Divine Covenant of Peace, Non-Violence & Sacred Protection

The **GFI Healing Arts Retreat Center & Community Village** is founded upon a sacred covenant of peace, compassion, reverence, and harmony with all life.

We believe that true protection is cultivated through consciousness, spiritual integrity, right relationship, and the frequency we collectively choose to embody.

Inspired by the ancient wisdom carried by the Hopi people, known as “The Peaceful People,” we honor a path of humility, compassion, non-violence, and respect for all beings.

This community is devoted to creating a sanctuary where peace is not simply an intention, but a lived practice.

We choose a way of being rooted in:

- Love rather than fear
- Creation rather than destruction
- Healing rather than harm
- Unity rather than separation

Within this sacred community:

- We do not carry weapons.
- We do not permit firearms within shared community spaces.
- We do not engage in violence, threats, intimidation, or intentional harm toward humans, animals, or the Earth.

This land is held as sacred space—a place of prayer, healing, restoration, and conscious stewardship.

We honor the belief that through alignment with Divine Love, spiritual integrity, and collective coherence, we create a field of safety, peace, and protection.

The greatest protection we cultivate is the frequency we embody together:

- Peace.
- Love.
- Harmony.
- Compassion.
- Divine Presence.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Through conscious living and sacred stewardship, we create a sanctuary where fear is transformed, conflict is approached with wisdom, and all beings are invited into deeper remembrance.

Should challenges or differences arise, they are approached through:

- Conscious communication
- Restorative dialogue
- Spiritual accountability
- Compassionate resolution
- Self-reflection and growth
- Never through domination.
- Never through violence.
- Never through fear.

This is a community of healing artists, sacred servants, earth stewards, and conscious beings devoted to a mission greater than the individual self.

Those who feel called to this land are invited to walk the path of peace as a daily devotion—not merely as an idea, but as a way of life.

Together, we become a living prayer.

A sanctuary of healing.

A field of love and remembrance.

A sacred community devoted to healing the Earth and humanity from the inside out.

This is our commitment.

This is our remembrance.

This is the path we choose to walk together as peaceful people.

The Slow-Build, Sacred Development Path

The **GFI Healing Arts Retreat Center & Community Village** is being brought into form through a slow-build, community-powered model rooted in sacred stewardship, sustainability, and Divine timing.

We believe that lasting foundations are built with intention, integrity, patience, and collective participation.

Rather than rushing to complete a vision overnight, we are choosing to build consciously—allowing each phase to unfold as resources, aligned community members, and Divine guidance come together.

This vision is not built by one person alone.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

It is built through **commUNITY**.

Each healing artist, sacred land steward, volunteer, donor, investor, builder, and community member becomes part of a living mission dedicated to raising the vibration and frequency of humanity and the Earth.

Every Covenant-Based Land Stewardship Contribution, every act of sacred service, every structure raised, every tree planted, and every offering shared becomes part of the foundation upon which this sanctuary is being created.

Phase One — Land Secured (Complete)

We are grateful to share that the first phase of this vision has already been accomplished.

Phase One Milestones

- Twenty (20) acres of agriculturally zoned (AGR) land have been secured for the development of the GFI Healing Arts Retreat Center & Community Village.
- The land has been thoughtfully envisioned to support three interconnected areas:
 - **The North Star**— The home of the GFI Healing Arts Retreat Center, including healing spaces, ceremonial areas, retreat facilities, retreat accommodations, gardens, educational spaces, and intentional infrastructure.
 - **The South Star** — The Healing Arts Community Village, where resident healing artists, facilitators, sacred land stewards, and families will live, serve, create, and grow together.
 - **The Vesica Piscis Vortex**— A shared communal gathering space designed to support connection, celebration, gathering, gardens, and community life.
- The property is well suited for eco-conscious construction, regenerative agriculture, food cultivation, permaculture, and phased community development.

Every Covenant-Based Land Stewardship Contribution received is being reinvested directly into the continued development of the land, infrastructure, and long-term mission of the community.

Your contribution becomes part of something much greater than an individual homesite—it helps establish the foundation of a living sanctuary that will serve generations to come.

Establishing the Foundation

Alongside the physical land, we are intentionally building the spiritual, organizational, and operational foundations needed to support this vision for generations.

This includes:

- Establishing foundational stewardship agreements and community frameworks
- Developing community systems that support shared stewardship and long-term sustainability

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Creating operational structures that support retreats, educational programming, and healing arts offerings
- Preparing the land to be consecrated as sacred space dedicated to peace, healing, harmony, and collective service

Just as important as building structures is building a community rooted in trust, integrity, shared purpose, and loving stewardship.

Sacred Stewardship for the Future

As this vision continues to unfold, we are also laying the groundwork for the long-term protection of the land and its mission which includes:

- Establishing a nonprofit organization held in trust to provide long-term stewardship and protection of the land
- Continuing to refine community stewardship agreements and shared operating frameworks
- Supporting a model in which community members receive Stewardship Residency and land use rights through Covenant-Based Land Stewardship rather than traditional land ownership

The retreat center, educational offerings, healing arts ministry, and mission-driven programs will continue to be operated through **Goddess Flow International Inc.**, while the long-term stewardship structure evolves in alignment with the needs of the community and the guidance of Spirit.

Where We Are Today

Transparency is important to us.

At this stage of development:

- The twenty (20) acres designated for the GFI Healing Arts Retreat Center & Community Village are currently held through Goddess Flow International Inc.
- The property exists within a larger eighty (80) acre parcel in partnership with Here After Farms during the subdivision process.
- Goddess Flow International currently holds a twenty-five percent (25%) equitable interest in the full eighty-acre property while subdivision, final payments, and deed transfers are completed.
- Upon completion of subdivision and transfer, the twenty-acre community property will continue under Goddess Flow International Inc. until the long-term nonprofit stewardship structure is established.

We believe in sharing this openly so every prospective community member understands both where we are today and the direction we are moving together.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Building Together

We are currently in the earliest stages of bringing life onto the land.

During this phase, community members may begin cultivating the land using temporary or removable structures while permanent infrastructure is developed.

Examples may include:

- RVs
- Tents
- Yurts
- Tiny homes on wheels
- Storage sheds
- Shipping containers adapted for temporary use
- Other removable structures aligned with community guidelines

As our founding community members are aligned and established over the next 12 months, our collective focus will gradually be transitioning into building permanent earthen homes, shared community buildings, gardens, and retreat center facilities.

Each Stewardship Resident is responsible for developing their own residency space and associated costs.

At the same time, we are actively calling in aligned investors, philanthropists, grant opportunities, and mission-driven partnerships to support the development of shared infrastructure that benefits the entire community.

We believe this vision will not be built through individual effort alone, but through the collective hearts, hands, gifts, and stewardship of those who feel called to help birth a New Earth sanctuary together.

Phase Two — Building the Community & Foundational Infrastructure

With the land now secured, we enter the next sacred chapter of this vision.

This is the phase where the community begins to come alive.

We are calling in the founding circle of healing artists, lightworkers, conscious builders, regenerative gardeners, educators, families, and sacred land stewards who feel a genuine calling to help co-create this New Earth sanctuary.

This is not simply an invitation to live on beautiful land.

It is an invitation to become part of a living mission dedicated to raising the vibration and frequency of humanity and the Earth through healing arts, sacred stewardship, conscious community, and loving service.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

We are seeking individuals and families who resonate with:

- Earth-conscious, plant-based, fully sober, regenerative living
 - Sacred stewardship of the land
 - High-vibrational healing arts
 - Collective service to humanity
 - Community living rooted in love, reciprocity, and respect
 - Spiritual growth and embodied practice
 - Building the New Earth together
 - Community Earthen Building and Sacred Land stewardship model
 - Long-term contribution through Covenant-Based Land Stewardship or Sacred Exchange Residency
-

Becoming a Founding Community Member

Joining the GFI Healing Arts Retreat Center & Community Village is a sacred process of mutual discernment.

Just as individuals are invited to explore whether this community feels aligned for them, we also take time to lovingly discern whether each prospective member is aligned with the vision, lifestyle, and shared purpose we are cultivating together.

Our intention is to protect the harmony, safety, and energetic integrity of the community while ensuring that each person who joins feels genuinely called to this way of life.

Step One — Application & Alignment Journey

The first step is completing our community application process.

This allows us to begin getting to know one another while offering prospective members an opportunity to explore the vision more deeply.

The alignment journey includes:

- Community Interest Questionnaire
- Personal Alignment Conversation
- Mutual discernment interview
- Background screening
- Completion of required onboarding steps
- Acceptance into the community

Our screening process is conducted with compassion, confidentiality, respect, and care for:

- The community
- Children and families

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Elders
- Retreat guests
- The sacred land
- The collective healing field we are stewarding together

Because every person contributes to the vibration of the whole, we intentionally welcome those who feel sincerely aligned with this shared mission.

Step Two — The Goddess Flow Immersion Initiation

Before beginning Stewardship Residency on the land, every adult community member completes the **Goddess Flow Immersion Initiation**.

This sacred initiation serves as a ceremonial gateway into the community and supports each individual in entering the land with presence, coherence, and conscious intention.

Rather than simply moving onto property, we believe we are entering into sacred relationship—with ourselves, one another, and the Earth.

The immersion supports:

- Personal healing
- Nervous system regulation
- Cellular restoration
- Releasing inherited patterns
- Divine Feminine and Divine Masculine integration
- Embodied spiritual practice
- Awakening higher consciousness
- Alignment with the frequency of the land
- Sacred stewardship and community living

The Goddess Flow Immersion consists of eight self-paced online modules.

Some members may complete the journey in eight days if their schedule is completely open and free, while others may choose eight weeks or longer for deeper integration and time spacing.

Each individual is encouraged to move at the pace that best supports their embodiment.

This immersion is included for every Covenant-Based Land Stewardship Member because maintaining the energetic foundation of our community is just as important as building homes and infrastructure.

Our greatest foundation is the consciousness we cultivate together.

Covenant-Based Land Stewardship

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Those who are accepted into the community may be invited to participate through a **Covenant-Based Land Stewardship Contribution**.

This contribution supports both:

- your Stewardship Residency within the community
- Onboarding and administration; and
- the collective development of the GFI Healing Arts Retreat Center & Community Village.

Unlike traditional real estate, this is a covenant of sacred stewardship, mutual responsibility, and long-term participation in a shared vision.

Stewardship Residency Includes

Members receive:

- Stewardship Residency within the community
 - Exclusive stewardship and use of a designated residency space on the land
 - Community onboarding and integration
 - Goddess Flow Immersion Initiation
 - Community Covenant
 - Stewardship Residency Agreement
 - Shared access to community spaces and infrastructure as they are completed
 - Covenant-Based Stewardship Certificate
 - Opportunities to participate in the retreat center's mission-based revenue distribution
 - Opportunities to contribute through healing arts, education, retreats, community building and stewardship, and sacred service
-

Shared Community Spaces

As the community grows, members will enjoy shared access to spaces such as:

- Community kitchen
- Bathhouse and shower facilities
- Ceremony spaces
- Meditation areas
- Organic food Gardens
- Zen Food forests
- Gathering circles
- Walking paths
- Community learning spaces
- Sacred outdoor environments
- Homeschool nature space
- Fitness and Sports area

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

These shared spaces are designed to strengthen community connection while supporting sustainable and cooperative living.

Founding Stewardship Contribution Options

Current founding opportunities include:

½ Acre Stewardship Residency

- \$2,222 paid in full

or

- Twelve monthly contributions of \$199
- Total contribution: \$2,388

1 Acre Stewardship Residency

- \$4,444 paid in full

or

- Twelve monthly contributions of \$399
 - Total contribution: \$4,788
-

Annual Community Stewardship Contribution

To support the ongoing care of the community, members also contribute an annual stewardship contribution.

This shared contribution helps support:

- Property taxes
- Road maintenance
- Shared utilities
- Community facilities
- Land stewardship
- Shared infrastructure
- Collective amenities

The estimated annual contribution is currently projected to be approximately **\$222 per year**, with the final amount determined by the size of the active community and shared operating costs over the next 12 months of development.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Sacred Exchange Residency

Not every soul is able to participate through financial stewardship.

However, some can serve through their gifts, time, talents, and presence.

For these individuals, the GFI Healing Arts Retreat Center also offers a **Sacred Exchange Residency**.

This pathway welcomes those who feel called to contribute through meaningful service while living within the community.

We also hold a special place in our hearts for single mothers who desire to rebuild their lives within a supportive village rooted in healing, sisterhood, sacred motherhood, and shared community.

We have a ½ acre dedicated space to build a sacred exchange residency for 4 sacred exchange residents and 1 acre dedicated to our single mother sanctuary which 8 mothers and children will share.

Sacred Exchange May Include

- Land stewardship
- Gardening
- Permaculture
- Natural building
- Retreat support
- Guest services
- Community kitchens
- Administrative support
- Children's programming
- Facilities care
- Other community needs aligned with each person's gifts

Every Sacred Exchange Residency is rooted in reciprocity rather than transaction.

Time.

Presence.

Love.

Skill.

Prayer.

Service.

These are all sacred forms of contribution.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Collective Mission Funding & Sacred Reciprocity

The unfolding of this Divine Plan is supported through the collective devotion, creativity, generosity, and shared stewardship of the community.

Rather than relying upon a single funding source, we are cultivating a diverse ecosystem of mission-aligned support that allows the vision to grow organically, sustainably, and in harmony with Divine timing.

As each phase of the project unfolds, so too will the opportunities to collectively generate the resources needed to bring the vision into physical reality.

Funding for the Healing Arts Retreat Center and Healing Arts Community Village may be supported through a combination of:

- Covenant-Based Land Stewardship Contributions
- Charitable donations from individuals who resonate with the mission
- Philanthropic gifts and mission-aligned benefactors
- Community-led fundraising campaigns
- Mission-aligned investors and impact investment opportunities
- Grants and nonprofit funding opportunities as they become available
- Healing Arts Festivals
- Retreats, immersions, and educational experiences
- Healing arts trainings and certification programs
- Community classes and workshops
- Holistic products, creative offerings, and artisan marketplaces
- Revenue generated through the Healing Arts Retreat Center
- Collaborative fundraising initiatives created and supported by community members
- Other inspired and mission-aligned opportunities that arise in service to the collective vision

We recognize that every member carries unique gifts, talents, skills, relationships, and creative ideas that may help nourish the continued growth of the community. As the village evolves, community members are invited to participate in fundraising initiatives that feel joyful, inspired, and aligned with their own gifts and capacities.

Some may organize educational events.

Some may host retreats.

Some may create artistic offerings.

Some may connect the project with philanthropists, donors, grant opportunities, or aligned investors.

Others may simply offer their prayers, presence, service, or creative inspiration.

Every contribution—whether financial, practical, relational, creative, or energetic—is honored as part of the sacred reciprocity that sustains this living vision.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

As resources increase, each phase of development naturally gives rise to the next, allowing the land to unfold in a way that remains grounded, intentional, financially responsible, and aligned with the highest good of the community, the Earth, and all those we are called to serve.

Together, we become both the builders and the benefactors of this Divine Plan, demonstrating that when hearts unite in shared purpose, even the greatest visions can be brought into physical form through love, stewardship, and collective devotion.

Foundational Infrastructure Development

As our founding community grows, we will continue developing the essential infrastructure needed to support a thriving regenerative village.

Initial development includes:

- Water systems
- Access roads and walking paths
- Solar energy
- Ecological sanitation
- Community bathhouse
- Community kitchen
- Gardens and food forests
- Meditation spaces
- Ceremony spaces
- Retreat gathering areas
- Temporary eco-lodging
- Permanent earthen homes
- Sacred Exchange Residency areas
- Founder and steward living spaces

Every phase of development will unfold through ecological design, sacred stewardship, collaborative effort, and Divine timing.

Until shared infrastructure is fully established, each Stewardship Resident will provide their own basic off-grid living systems while we collectively build the permanent foundation of the community together and share with one another as the community needs, all having as ONE!

Phase 3 — The Full Expression of the Divine Plan

With the founding community rooted upon the land and the foundational infrastructure established, Phase 3 marks the unfolding of the greater vision entrusted to us.

This is where the land begins to fully blossom into the sacred sanctuary it has always been destined to become.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

What once began as open earth now becomes a living expression of New Earth consciousness—a regenerative village where architecture, ecology, healing arts, education, ceremony, and community exist in harmony with one another.

Rather than simply constructing buildings, we are cultivating a living ecosystem where every pathway, garden, dwelling, gathering space, and ceremonial structure serves the wellbeing of humanity, the Earth, and generations yet to come.

This phase is approached intentionally, allowing the land itself to guide the timing and rhythm of its unfolding.

Sacred Site Design & Living Land Geometry

As the community grows, the master vision for the land gradually comes into physical form through thoughtful, Earth-honoring design.

This includes:

- Sacred geometry-inspired land design
- Placement of homes and community spaces in harmony with the natural landscape
- Protection of natural water flow, wildlife habitats, and ecological corridors
- Expansion of ceremonial spaces that honor the elemental energies of the land
- Integration of forests, gardens, gathering spaces, homes, and retreat facilities into one unified living ecosystem

As each addition is made with intention, the land itself becomes an active participant in the healing work, supporting coherence, peace, and high vibrational living.

Renewable Energy & Water Sovereignty

As the village expands, we will continue developing resilient systems that support long-term sustainability and harmonious living with the Earth.

Future development may include:

- Renewable Energy
- Community solar systems
- Battery storage for off-grid resilience
- Distributed renewable energy throughout the property
- Energy-conscious building design
- Wind-powered supplemental systems where appropriate
- Water Stewardship
- Community wells
- Solar and wind-powered water systems
- Rainwater harvesting
- Water filtration
- Irrigation designed for regenerative agriculture
- Water conservation practices that honor the sacredness of this resource

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Our intention is not simply independence, but right relationship with the natural elements that sustain all life.

Regenerative Food Systems

As the land matures, our food systems will continue expanding to nourish both community life and retreat guests.

This vision includes:

- Permaculture gardens
- Food forests
- Medicinal herb gardens
- Native and pollinator plantings
- Seed saving
- Regenerative farming
- Educational growing spaces for children and families

Together these living systems become a Garden of Eden in motion—where nourishment, education, healing, and stewardship naturally coexist.

Educational Village

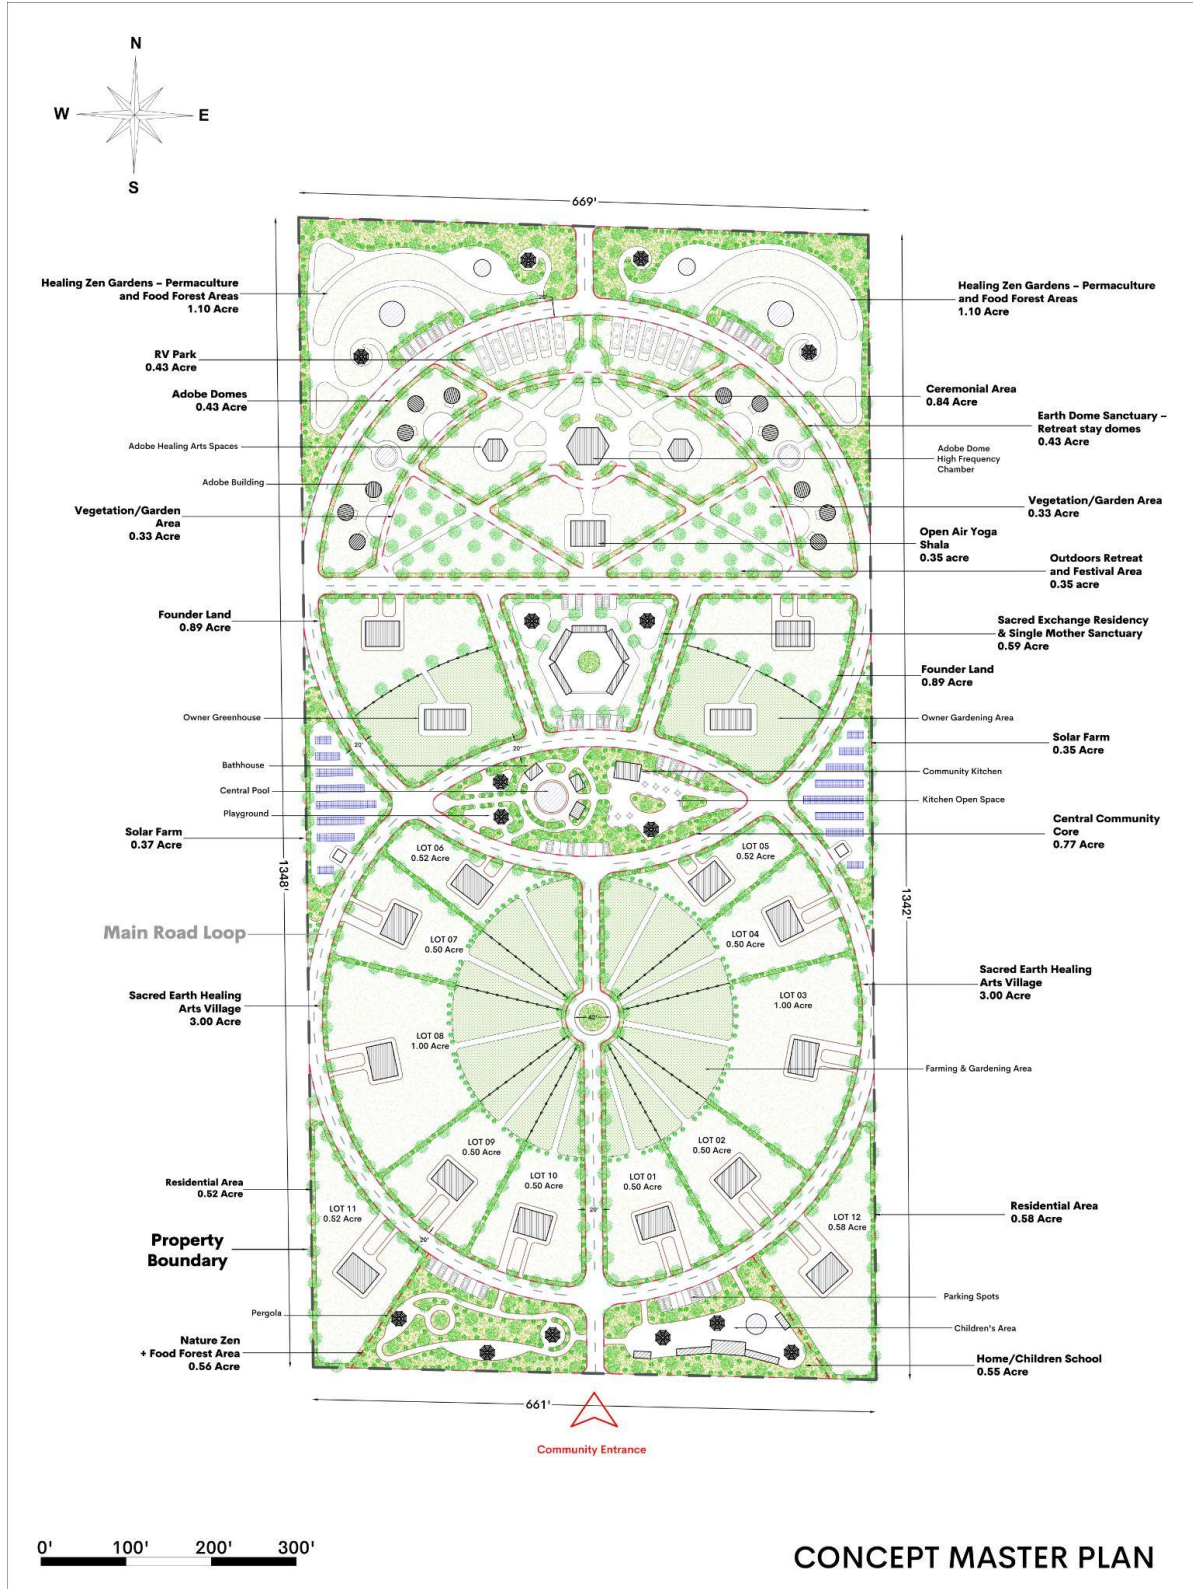

Learning becomes woven into everyday life.

Future educational spaces may include:

- Nature-based homeschool environments
- Outdoor classrooms
- Healing arts education
- Apothecary and Herbal Medicine
- Music, movement, and creative arts
- Intergenerational learning
- Earth stewardship education
- Embodiment practices rooted in The Goddess Flow Method™

Education becomes something lived—not merely taught.

Wellness & Recreation

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Wellbeing is woven into the landscape itself.

Future community spaces may include:

- Natural swimming pools
- Wellness gardens
- Outdoor yoga and movement spaces
- Walking trails
- Meditation pathways
- Forest bathing areas
- Herbal gardens
- Natural fitness spaces
- Children's recreation areas

Every environment is designed to support nervous system restoration, joyful movement, community connection, and embodied living.

Retreat Center Expansion

As the vision unfolds, the Healing Arts Retreat Center grows into a sanctuary welcoming seekers from all around the world.

Future development may include:

- Earth-based guest accommodations
- Nature-integrated eco-lodging
- Retreat facilities
- Community dining spaces, food garden, and zen fruit forest area
- Healing environments
- Multi-day immersion experiences
- Educational programs
- International gatherings devoted to healing, peace, and conscious evolution

The retreat center becomes a place where people arrive not simply to rest—but to remember who they truly are.

Sacred Architecture & Ceremony Spaces

As Phase 3 unfolds, dedicated spaces for healing, prayer, movement, and sacred gathering emerge across the land.

These may include:

- Open-air yoga shalas
- Earth domes
- Sacred earth high vibrational temples
- Fire circles
- Meditation halls
- Sound healing sanctuaries
- Initiation spaces

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Outdoor ceremonial environments

Each space is created to support the collective work of healing humanity while anchoring greater peace, love, harmony, and coherence upon the Earth.

Community Expansion

As our community naturally grows, additional village areas will continue unfolding through intentional stewardship.

Future expansion may include:

- Shared gathering areas
- Village commons
- Creative arts spaces
- Music and cultural venues
- Expanded residency areas
- Additional gardens and community landscapes

Growth will always be guided by alignment rather than urgency.

We are not seeking rapid expansion.

We are cultivating lasting relationships rooted in shared purpose.

A Living New Earth

Phase 3 represents far more than infrastructure.

It reflects the moment when the original Divine Plan becomes fully embodied upon the land.

Here, renewable energy, regenerative food systems, holistic education, sacred ceremony, healing arts, ecological stewardship, and conscious community become one living expression.

Together we are creating a place where humanity remembers how to live in harmony with the Earth, with one another, and with Divine Source.

This is not simply a destination.

It is a way of life.

Shared Stewardship of the Divine Plan

As the community grows, so too does the shared stewardship entrusted to those who walk this path together.

The stewardship of the land, the retreat center, and the Healing Arts Community Village is held through a collaborative model that honors both practical responsibility and spiritual alignment.

Every person contributes according to their gifts, experience, and calling.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Each role exists in service to something greater than ourselves.

Goddess Flow International

Goddess Flow International serves as the founding steward of the Divine Plan and carries responsibility for preserving the long-term mission, protecting the sacred purpose of the land, coordinating community development, and supporting the continuity of this vision for future generations.

Its role is to help ensure that the original mission remains rooted in peace, love, harmony, ecological stewardship, and service to humanity as the community continues to evolve.

Community Board

Every founding member is invited to participate in the shared stewardship of the community through the Community Board.

Together the Board offers:

- Collective participation
- Community dialogue
- Shared wisdom
- Stewardship recommendations
- Collaboration in the continued unfolding of the vision

Each voice matters.

Each member helps shape the living culture of our community through respectful participation and shared stewardship.

Sacred Council of Elders

The Sacred Council of Elders is composed of individuals who demonstrate deep spiritual maturity, embodied wisdom, integrity, compassion, and long-standing devotion to the mission.

Service upon the Council is based not upon age, but upon lived embodiment.

The Council offers:

- Spiritual guidance
- Ceremonial support
- Community discernment
- Restorative dialogue
- Wisdom during times of transition
- Support for maintaining harmony within the collective field

The Council serves as a circle of wisdom that helps preserve the spiritual heart of the community.

A Unified Stewardship Model

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Together these three circles of stewardship create a balanced foundation for the community's continued evolution.

Goddess Flow International lovingly stewards the long-term vision and continuity of the mission.

The Community Board reflects the shared voice, participation, and lived experience of the collective.

The Sacred Council of Elders helps nurture the spiritual integrity, harmony, and wisdom of the community.

Each serves a distinct purpose.

Together they help cultivate a thriving, resilient, and heart-centered community rooted in shared stewardship.

Community Build Model

This community is built through sacred collaboration.

We build alongside one another.

We learn from one another.

We support one another.

Our collective efforts may include:

- Natural building
- Earthen home construction
- Skill-sharing
- Permaculture
- Regenerative design
- Infrastructure development
- Community workshare
- Shared learning experiences

While members may lovingly support one another throughout the building process, each resident remains responsible for the development of their own home and personal living space.

The Fruits of Building Together

Building in community cultivates far more than homes.

It cultivates:

- Lifelong friendships
- Trust
- Sacred reciprocity
- Shared purpose
- Practical skills
- Collective resilience

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Personal growth
- Living examples of regenerative community

Together we become living proof that another way of life is possible.

One rooted in stewardship rather than ownership.

Service rather than separation.

Collaboration rather than competition.

Love rather than fear.

Phase 3 is the full flowering of the Divine Plan.

Here, the Earth, humanity, and Divine Source come together in living partnership.

Together we become caretakers of a sanctuary where healing, regeneration, education, ceremony, stewardship, and sacred community are woven into everyday life.

As each heart says "yes" to this calling, we move one step closer to remembering what has always been possible:

Heaven on Earth, lived together.

Phase 4 — Retreat Center Activation & Collective Service

With the foundational community established and the essential infrastructure in place, Phase 4 marks the opening of the Goddess Flow International Healing Arts Retreat Center as a living sanctuary dedicated to healing, education, transformation, and sacred service.

This phase expands our ability to welcome guests from around the world while creating sustainable opportunities for our resident healing artists, teachers, facilitators, and community stewards to live their purpose in service to humanity.

As the retreat center grows, so too does our collective ability to fulfill the Divine Plan—raising the vibration and frequency of the Earth through embodied healing, conscious community, and sacred stewardship.

Healing Arts Experiences & Community Offerings

The Retreat Center will host a diverse range of transformational experiences designed to support healing, remembrance, embodiment, and spiritual awakening.

Expansive of our Earlier phase of Offerings may include:

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Glamping retreats during the early phases of development, gradually transitioning into earth homes, domes, and regenerative eco-lodging
- Healing Arts Retreats and multi-day immersions
- The Goddess Flow Method™ Trainings and Certification Programs
- Energy healing and embodiment intensives
- Sacred ceremonies and seasonal celebrations
- Meditation, yoga, breathwork, movement, and sound healing experiences
- Healing Arts Festivals
- Holistic education programs
- Children's nature-based learning experiences
- Community wellness gatherings
- Guest practitioner collaborations
- Artist residencies
- Retreats hosted by aligned community members
- Other inspired offerings that serve the mission and vision of Goddess Flow International

Each gathering becomes an opportunity to serve humanity while deepening our collective relationship with the Earth, with one another, and with Divine Source.

A Living Ecosystem of Sacred Service

The GFI Healing Arts Retreat Center is a living ecosystem where healing artists, educators, facilitators, gardeners, builders, musicians, creators, and soul-aligned land stewards contribute their unique gifts in support of the whole.

Every offering strengthens the collective mission.

Every retreat nourishes the land.

Every guest helps expand the vision.

Every act of service becomes part of the living prayer we are building and activating together.

Rather than functioning as isolated practitioners, we become a collaborative field of healing where individual gifts naturally strengthen the collective.

Supporting Healing Artists & Sacred Livelihood

One of the intentions of our community is to create an environment where healing artists can thrive while remaining devoted to their sacred calling.

Resident practitioners may have opportunities to:

- Facilitate retreats and healing experiences

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

- Teach classes, trainings, and workshops
- Offer private healing sessions
- Lead ceremonies and community gatherings
- Collaborate with visiting practitioners
- Participate in Healing Arts Festivals
- Develop educational programs
- Contribute their unique gifts to the collective mission

As opportunities expand, Goddess Flow International provides the shared foundation that supports these offerings through community spaces, retreat facilities, collaborative promotion, administrative systems, and mission-aligned organizational stewardship.

This allows practitioners to focus more fully on their sacred work while contributing to the collective growth of the sanctuary.

Sacred Reciprocity & Collective Prosperity

Our community is rooted in a Sacred Shared Economic Model—one that honors contribution, reciprocity, stewardship, and shared flourishing.

Financial exchange is understood as a sacred energy that allows the mission to continue unfolding.

Revenue generated through retreats, educational experiences, festivals, practitioner offerings, donations, and other mission-aligned activities supports:

- Land stewardship and ecological restoration
- Community infrastructure
- Retreat Center operations
- Educational programming
- Healing Arts initiatives
- Fair compensation for practitioners and contributors
- Continued development of the sanctuary
- Long-term sustainability of the Divine Plan

As the Retreat Center grows, the entire community grows together.

When the mission flourishes, opportunities expand for everyone who helps bring the vision to life.

A Protected Sanctuary for Future Generations

The land itself remains devoted to its sacred purpose.

It is held in stewardship to serve healing, education, ecological regeneration, spiritual growth, and community for generations to come.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Homes may be lovingly built.

Gardens may flourish.

Children may grow.

Communities may gather.

Lives may be transformed.

Yet the land itself remains protected from commodification so that its highest purpose is never lost.

Through covenant-based stewardship, we preserve not only the Earth beneath our feet, but the frequency we are cultivating together.

The Vision Fully Alive

Phase 4 represents far more than the opening of a retreat center.

It is the moment when the Divine Plan begins serving humanity on a larger scale.

Healing artists are living their purpose.

Guests are arriving from around the world.

The land is flourishing.

Children are learning in harmony with nature.

Gardens are feeding the community.

Ceremonies are honoring the seasons.

The vibration and frequency of the Earth are being elevated through thousands of acts of love, healing, prayer, stewardship, and sacred service.

This is a living sanctuary.

A ministry of healing.

A regenerative community.

A place where people come home—to themselves, to the Earth, to one another, and to the Divine.

Phase 5 — A Living Blueprint for New Earth

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Phase 5 represents the flowering of the Divine Plan.

What begins as one sacred sanctuary rooted in the high desert of Arizona is intended to become a living blueprint that inspires the emergence of many healing communities across the Earth—each honoring the unique spirit of its land while remaining rooted in the same foundational principles of peace, love, harmony, sacred land stewardship, and service to humanity.

Our intention is never expansion for the sake of growth alone. Rather, it is the natural unfolding of a vision that proves another way of living is possible—a way that restores right relationship with the Earth, with one another, and with the Divine.

As this community matures, we envision supporting others who feel called to steward land in alignment with these principles, adapting the model with reverence for local cultures, ecosystems, and Indigenous wisdom wherever appropriate.

Each sanctuary will become its own living expression of the Divine Plan while honoring the shared values that unite us:

- Sacred stewardship of the Earth
- Regenerative living and ecological restoration
- Healing arts education and holistic wellbeing
- Community rooted in reciprocity and service
- Spiritual embodiment and remembrance
- Peaceful coexistence with all life
- Living in harmony with natural law

Together, these sanctuaries become a global network of light—individual expressions of one shared intention to raise the vibration and frequency of the Earth through love in action.

The Arizona GFI Healing Arts Retreat Center serves as the first seed.

May many more grow from its roots.

Sacred Alignment Pathway

Becoming part of this community is not simply an application process—it is a journey of mutual discernment.

We believe that the most harmonious communities are created when both the individual and the community feel a genuine sense of alignment. Each step allows space for reflection, conversation, and prayerful consideration so that everyone enters this shared field with clarity, integrity, and joyful commitment.

Step One — Explore the Vision

Take time to thoughtfully review the Divine Plan and Covenant Agreements.

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Allow yourself space to feel whether this way of living truly resonates with your heart, your values, and the life you are being called to create.

Step Two — Submit an Interest Application

Complete the Community Interest Questionnaire and share your story, your gifts, your intentions, and what is calling you toward this community.

Step Three — Sacred Alignment Conversation

Applicants who appear aligned will be invited into a one-on-one conversation.

This is not an interview in the traditional sense. It is an opportunity for both you and our community to listen deeply, ask questions, and explore whether we are truly meant to walk this path together.

Step Four — Letter of Acceptance

Following our discernment process, applicants may receive one of the following:

- A Letter of Acceptance, inviting you to continue into the stewardship pathway.
- A Letter of Future Alignment, recognizing your interest while suggesting that another season or pathway may better support your journey.

We trust divine timing and believe that every outcome serves the highest good.

Step Five — Membership Activation

Members review and sign the Community Covenant and Membership Agreements, establishing a shared foundation of stewardship, reciprocity, and right relationship with one another and the land.

Once agreements are signed, members may choose one of two participation pathways:

- Covenant-Based Land Stewardship
- Sacred Exchange Residency

Each pathway supports the same shared mission through different forms of contribution and includes onboarding for membership activation.

Step Six — Goddess Flow Immersion Initiation

Before joining the land, all adult community members 18+ complete the Goddess Flow Immersion Initiation.

This sacred journey supports personal healing, energetic coherence, embodiment, and alignment with the values, rhythms, and collective field of the community before entering into shared stewardship of the land.

Step Seven— Community Integration

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

Following completion of the membership activation and initiation, members begin their community integration process, receive their stewardship designation and land access to prepare for residency in accordance with community readiness and development phases.

A Final Word

This community is not built upon urgency.

It is built upon alignment.

We are not simply gathering people who want to live on beautiful land.

We are calling together a family of healing artists, teachers, visionaries, builders, gardeners, musicians, parents, elders, children, and sacred servants who feel a deep inner knowing that humanity is ready for another way.

A way rooted in peace rather than fear.

In stewardship rather than ownership.

In collaboration rather than competition.

In remembrance rather than separation.

We believe that when enough hearts come together in coherence, the vibration and frequency of the Earth begins to rise.

Every garden planted.

Every ceremony offered.

Every child nurtured.

Every home lovingly built.

Every act of sacred service.

Every prayer whispered into the soil and soul.

All of it becomes part of a living field of healing that extends far beyond the boundaries of this land.

The Goddess Flow International Healing Arts Retreat Center & Healing Arts Community Village is our offering to that future.

If your soul has been quietly whispering that there must be another way to live...

If your heart longs to build as commUNITY rather than alone...

THE DIVINE PLAN - THE HEALING ARTS COLLECTIVE

If you feel called to dedicate your gifts in service to something greater than yourself...

If you feel deeply called to fulfill the mission and vision outlined in these pages...

Then perhaps this path has been calling you all along.

May your next step be guided by wisdom, heart, and soul.

May your heart remain open.

May your discernment be crystal clear.

And may we each continue raising the vibration and frequency of the Earth through the way we choose to live, love, serve, and steward this sacred world together.

With Peace, Love, and Light Always,

Devi Deanna ॐ Dhyana
